# Monaco

Oasis spas are world class hydrotherapy spas built using the best components from around the world. Compare the build quality, equipment and features and you'll see why Oasis spas are **Australia's best value for money spas**.

The Monaco is a large, luxurious dual recliner spa that combines state of the art ergonomic design with premium hydrotherapy jets to provide superior comfort and an awesome massage experience.

- Dual height "full body massage" lounges with neck massage jets
  - Side by side "love seats" plus 2 upright seats
  - Neck, calf, feet and back massage jets plus "volcano" jet
  - Recliner plus open style seating with room for up to seven

 Meets all Australian  
2456 safety standards

## Unbeatable Value for Money!

### Cheaper to Run

Our 8 Layer "Energy Smart" insulation system with "Custom Fit" cabinet and "Thermo Lock Barrier" traps heat from the pump and spa water to reduce running costs. Our "Energy Smart" filtration pumps are 22-61% cheaper to run.

Connected to a smart meter, your Spa Net SV control system can heat and filter using off-peak power, saving up to 25%. With "intuitive logic" and "economy mode" this control system reduces running costs further and can also control an energy efficient heat pump.

And the pump and connections are in place to run a gas heater, solar system or heat pump to reduce heating costs by up to 75%. Note: Some solar and gas systems may need a larger or extra circulation pump.

### Easier to Maintain

The "set and forget" multi-function control system ensures your spa is always clean and ready to use and has handy "lockout" and "sleep" modes.

Our Dynamic Water Management System with "Dual Pump" filter system, "Smart Flow" valve, high flow circulation pump, "Puresafe" ozone system (with mixing chamber) and Oasis Spa Sanitation System ensures safe, pure, clean, chlorine free water with minimal effort. Our optional silver ion "Micro Filters" make things even easier.

Our self cleaning, bearing-less PVC backed jets don't have clips that break, can't get damaged by chemicals or get clogged and stop spinning. And our maintenance free "Thermo-wood" cabinets never need oiling.

### A Better Massage

Broad stream "Aqua-ssage" hydro-massage jets give you a better massage effect. These adjustable and interchangeable pulse, swirl and deep tissue massage jets, combined with individual air and water massage controls allow you to create your perfect massage experience.

Just select your essential oil aromatherapy scent, choose your mood lighting effect and turn on the waterfall and optional sound system to create the perfect mood. Then relax and enjoy!

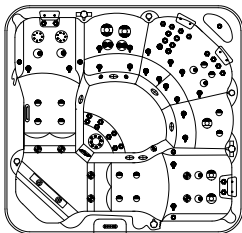

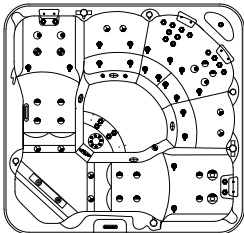

### Built to Last

Our oven cured "Tough Bond" 6 layer laminated spa shells are stronger and thicker (not many spa shells are 8-10mm thick!). The fibreglass "Tough Barrier" base stops vermin and weather damaging your spa. Our triple reinforced spa frames support every seat and are made from treated timber, then painted for maximum strength and long life.

Premium components from USA, Australia and Germany ensure long life and superior performance. All spas have the required safety certificates and meet all Australian Standards. Most importantly our Lifetime Support Plan provides the support and service you deserve.
